Getting to Know Eachother

Getting to Know Eachother

- Have you played with AWS before?

Getting to Know Eachother

- Have you played with AWS before?
- Do you have any AWS experience on the job?

Getting to Know Eachother

- Have you played with AWS before?
- Do you have any AWS experience on the job?
- Are you using AWS in production today?

Getting to Know Eachother

- Have you played with AWS before?
- Do you have any AWS experience on the job?
- Are you using AWS in production today?
- Are you planning to do any AWS Certifications?

Why AWS?

- We're no VMware haters y'all!

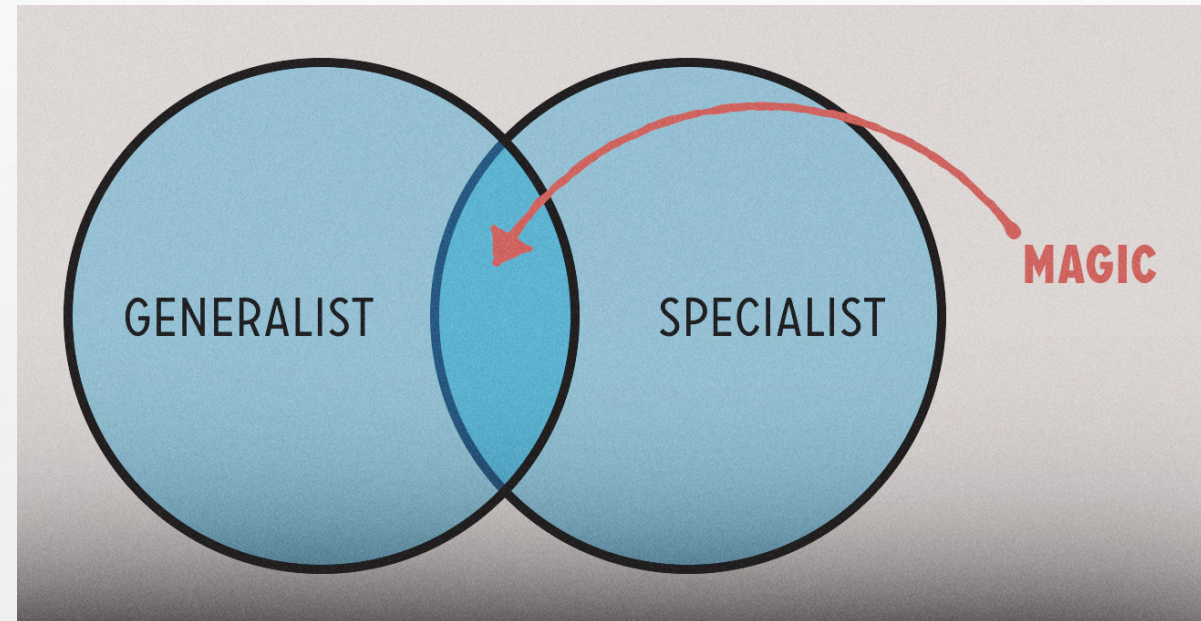

Why AWS?

- We're no VMware haters y'all!
- Because "Paradigms"
 - *"Cloud is not a technology,
it's a methodology"*
Eric Wright

Why AWS?

- We're no VMware haters y'all!
- Because "Paradigms"
 - *"Cloud is not a technology,
it's a methodology"*
Eric Wright
- Rise of the generalist(ish)!
 - AKA the Full Stack Engineer

Why AWS?

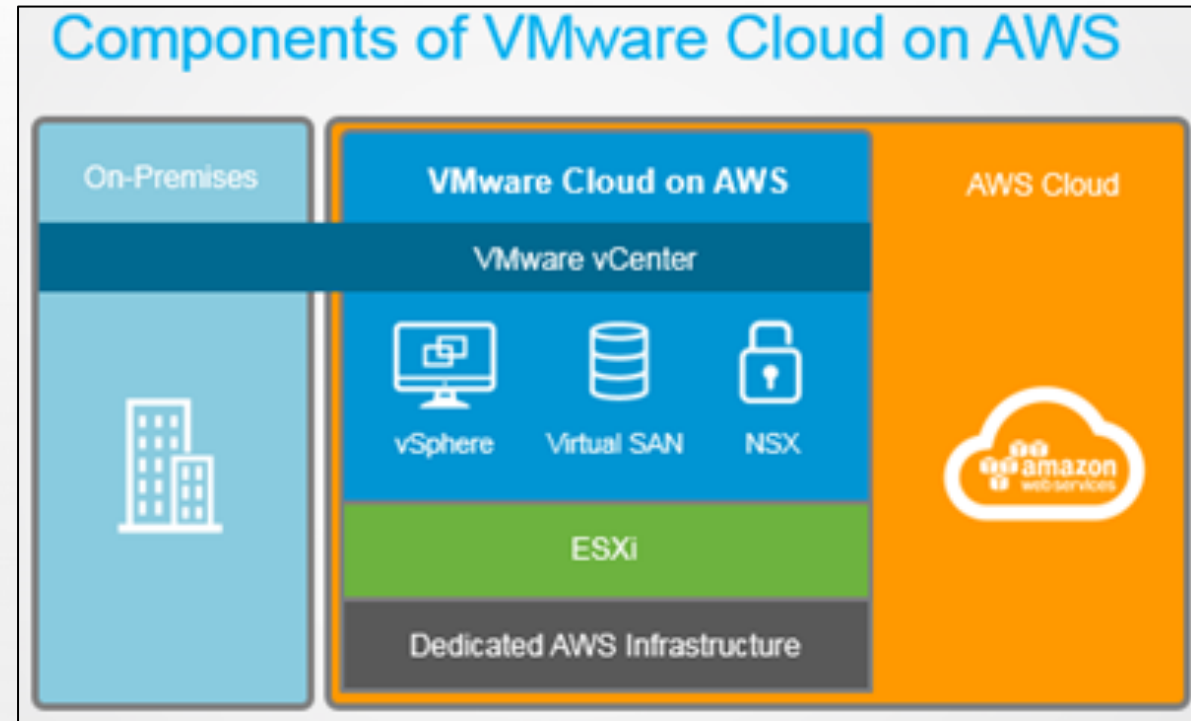

- We're no VMware haters y'all!
- Because "Paradigms"
 - *"Cloud is not a technology,
it's a methodology"*
Eric Wright
- Rise of the generalist(ish)!
 - AKA the Full Stack Engineer
- We can't ignore the 800lb gorilla

**You Can't Ignore the
800 Pound Gorilla**

Why AWS?

- We're no VMware haters y'all!
- Because "Paradigms"
 - *"Cloud is not a technology,
it's a methodology"*
Eric Wright
- Rise of the generalist(ish)!
 - AKA the Full Stack Engineer
- We can't ignore the 800lb gorilla
- VMware on AWS! #Winning!

To Business!

- Without further ado...

The Basics

- It can be daunting at first!
- You don't have to be an expert at everything!

Compute

EC2
EC2 Container Service
Elastic Beanstalk
Lambda
Server Migration

Storage & Content Delivery

S3
CloudFront
Elastic File System
Glacier
Snowball
Storage Gateway

Database

RDS
DynamoDB
ElastiCache
Redshift
DMS

Networking

VPC
Direct Connect
Route 53

Developer Tools

CodeCommit
CodeDeploy
CodePipeline

Management Tools

CloudWatch
CloudFormation
CloudTrail
Config
OpsWorks
Service Catalog
Trusted Advisor

Security & Identity

IAM
Directory Service
Inspector
WAF
Certificate Manager

Analytics

EMR
Data Pipeline
Elasticsearch Service
Kinesis
Machine Learning
QuickSight

Internet of Things

AWS IoT

Game Development

GameLift

Mobile Services

Mobile Hub
Cognito
Device Farm
Mobile Analytics
SNS

Application Services

API Gateway
AppStream
CloudSearch
Elastic Transcoder
SES
SQS
SWF

Enterprise Applications

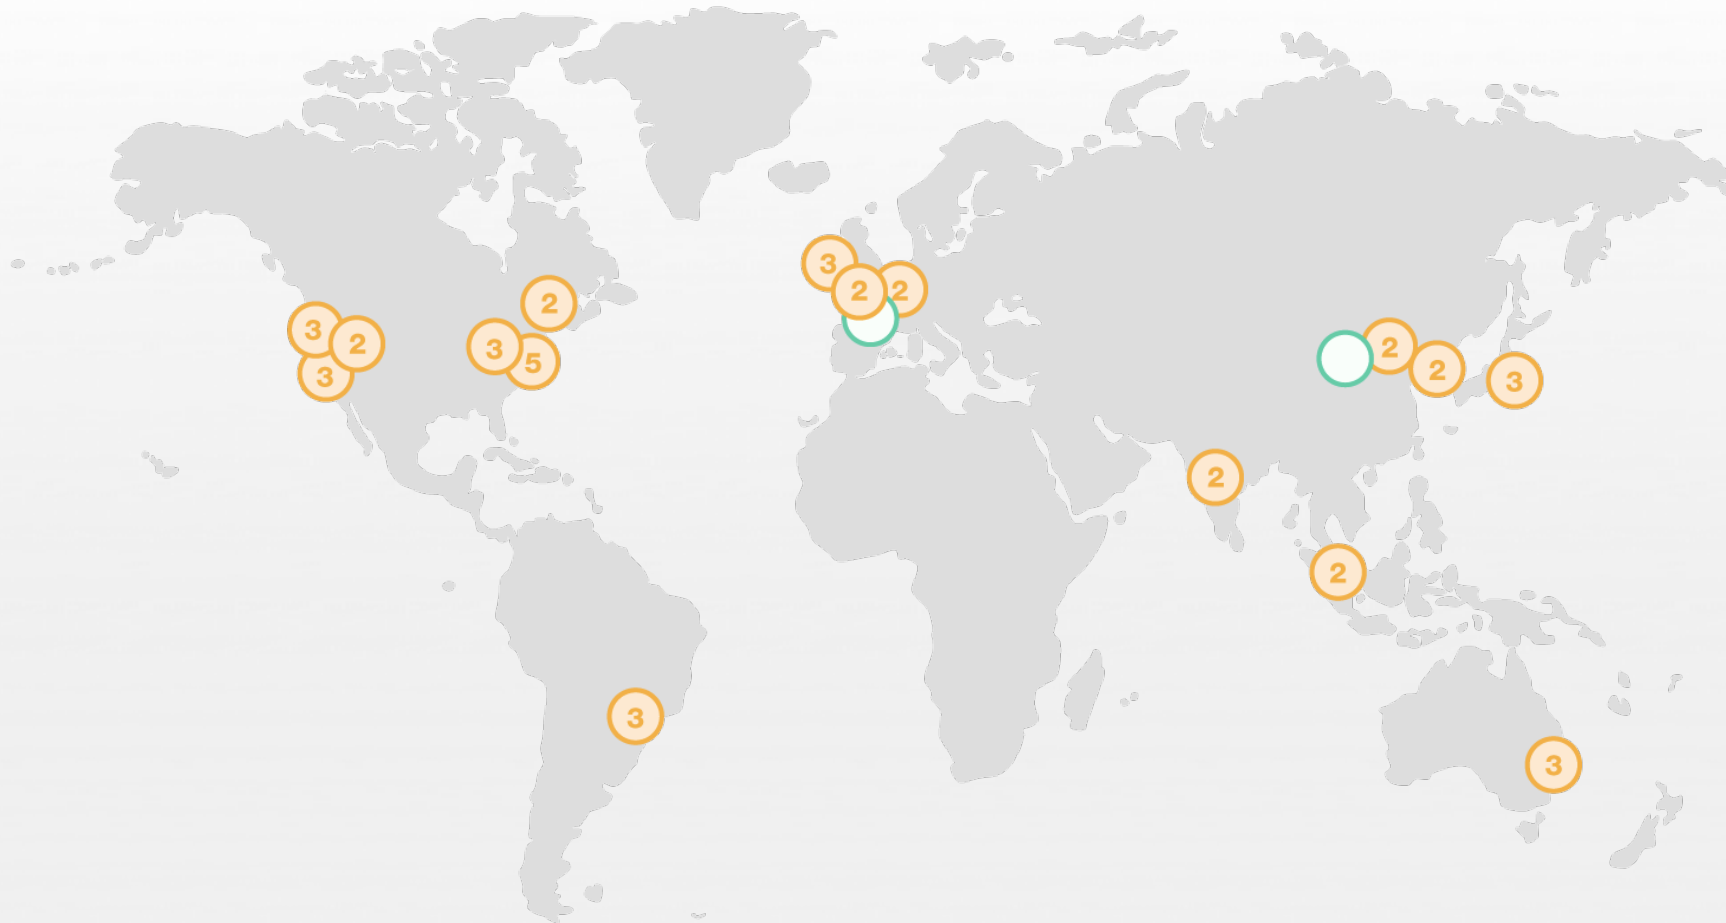

WorkSpaces
WorkDocs
WorkMail

The Basics

- Learn the Basics
 - Networking
 - VPCs & Subnets
 - Availability Zones
 - Compute
 - EC2
 - ELBs & ASGs
 - Storage & Data
 - EBS
 - S3
 - Glacier
 - RDS
 - Security
 - IAM

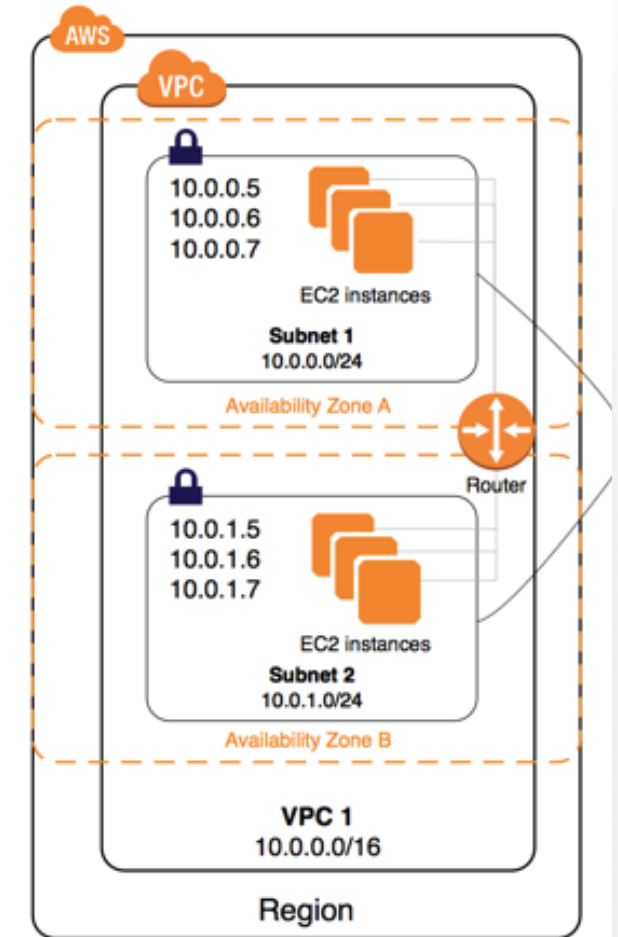

Networking – Regions & AZs

Networking

- A VPC is like your own Metro Network
- Secure connectivity
 - VPN or Direct Connect
- Subnets, Routing Tables, NAT etc – Normal Stuff!
- Security Groups - You can do Microsegmentation!
 - Not quite like NSX, but not far off!
- No Broadcast or Multicast
- No network access, port mirroring, etc

Compute – EC2 Basics

- Elastic Compute Cloud (EC2) = VMs
- Amazon Machine Image (AMI) = Template
- Based on heavily customise Xen Hypervisor
 - (but do we care any more?)
- Wide Range of T-Shirt Sizes
 - 1 vCPU with 512Mb (t2.nano)
 - 128 vCPU with 2TB (x1.32xlarge)
- Workload optimised:
 - T,C,M,G,R,I,D,P,X,F

Compute – EC2 Basics

- Different pricing models:
 - On Demand, Reserved, Spot
- Instance store and EBS backed
- No Over Commitment
- No 'vMotion/Live Migration'
- No console access

Compute – ELBs & ASGs

- ELBs / ALBs
 - Classic Load Balancer (L4)
 - Application Load Balancer (L7)
 - (Better and cheaper!)

Compute – ELBs & ASGs

- ELBs / ALBs
 - Classic Load Balancer (L4)
 - Application Load Balancer (L7)
 - (Better and cheaper!)
- ASGs
 - Auto-scaling groups
 - The real magic of the cloud!
 - Resilience & HA (even across DCs with Multi-AZ!)
 - Performance
 - Elasticity!
 - Enables new “paradigms”

Storage

- Block (EBS)
 - Just like VMDKs
 - Multiple Flavours – (SSD and HDD)
 - GP2 (General Purpose)
 - Provisioned IOPS (PIOPS) are like SIOC with QoS!
 - Magnetic now st1/sc1
 - Backups based on snapshots to S3

Storage

- Object (S3)
 - *The de facto object storage protocol*
 - API or HTTPS
 - Multiple tiers (resilience & access)
 - S3
 - S3-RRS
 - S3-IA
 - Replication
 - Auto-tiering to IA & Glacier

Storage

- Archive (Glacier)
 - Shrouded in mystery!
 - 3-5 hour retrieval time
 - New options:
 - Pay to expedite (1-5 minutes)
 - Bulk (5-12 hours)
 - Restore costs used to be bad (no more!)

Databases – Installing SQL is boring!

- RDS - Relational Database Service
- Many flavours!
 - MS SQL
 - Oracle!
 - MariaDB
 - MySQL (Native)
 - PostgreSQL
 - Aurora
- Multi-AZ (Optional)
- Automatic Backups (default)
- BYOL!

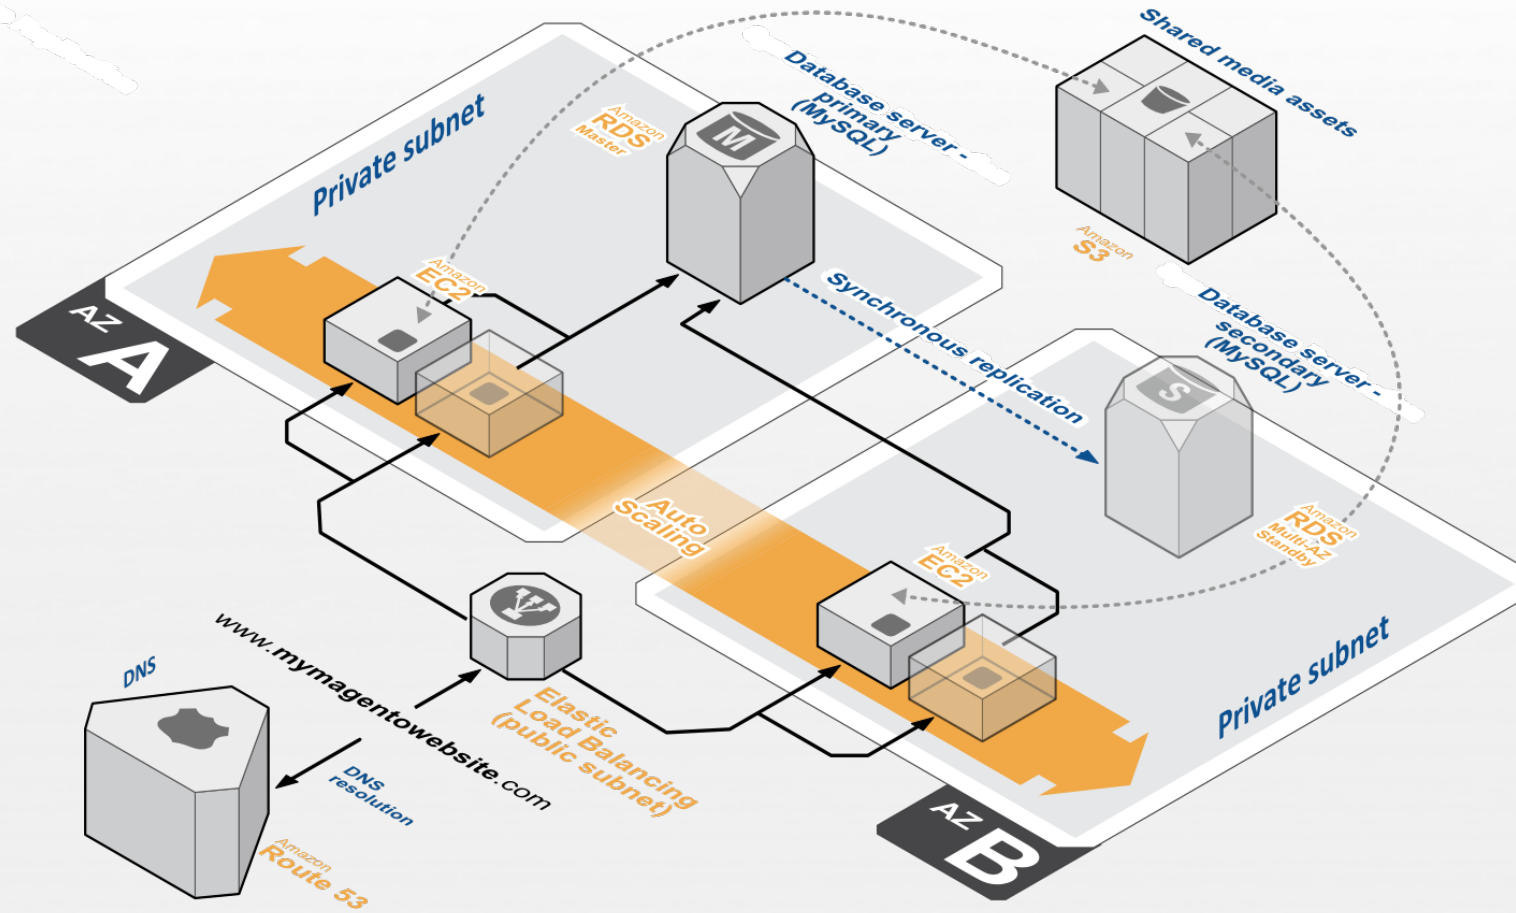

Security - IAM [is] the Daddy!

- RBAC
 - Users / Groups / Blah blah blah...
 - Policy based (JSON / YAML)
 - Instances too (roles)!
- Free MFA!
- Federation
 - ADFS (Keepin it corporate!)
 - Web Identity (Amazon, Facebook, Google)
- Account Design (aka Subscriptions)
 - AWS Organizations

A Simple AWS Solution

Avoid Getting Screwed on the First Date!

- NEVER LOG IN AS ROOT
- Use 2FA
- Configure billing alarms
- Don't put your keys on GitHub!
- NEVER LOG IN AS ROOT

Avoid Getting Screwed on the First Date!

- NEVER LOG IN AS ROOT
- Use 2FA
- Configure billing alarms
- Don't put your keys on GitHub!
- NEVER LOG IN AS ROOT
 - Except for vulnerability scan authorisation
 - And changing your support plan
 - And Closing Your Account

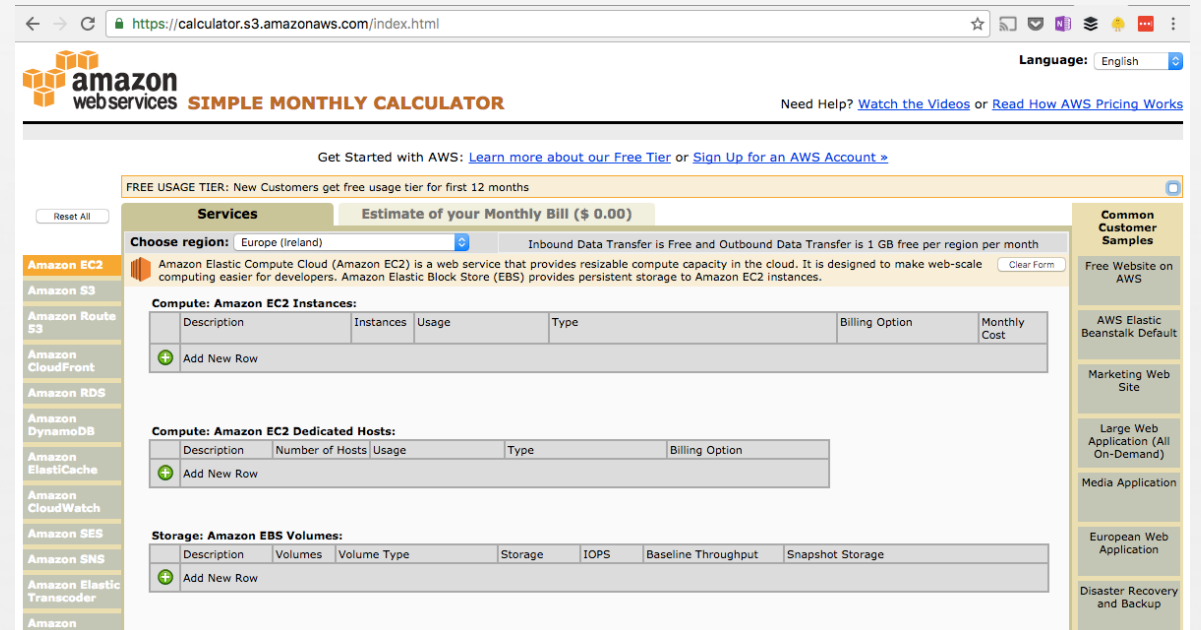

War Stories

- Clean up after yourself!
- Tagging is key!
- Configure your ASG health check timeouts
- IT Doing Shadow IT
- Blaming Cloud for Your Own Poor Security

Costs - Estimating

- Biggest upside and downside!
- Estimating usage ain't easy!
- Simply Monthly Calculator is a bit pants!

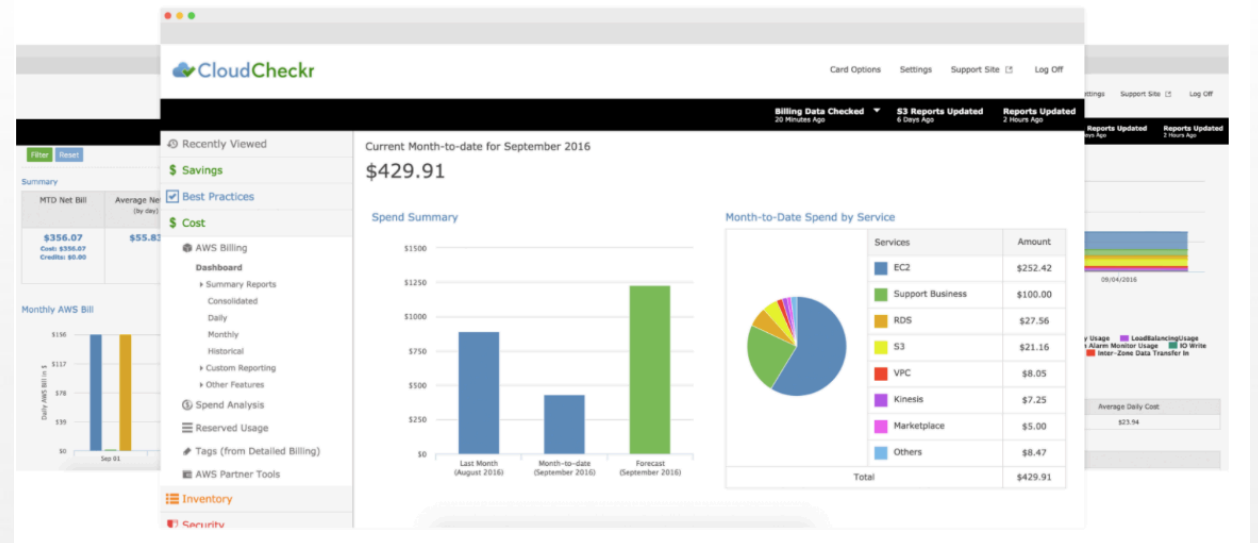

The screenshot shows the Amazon Simple Monthly Calculator interface. The browser address bar displays <https://calculator.s3.amazonaws.com/index.html>. The page header includes the Amazon Web Services logo and the title "SIMPLE MONTHLY CALCULATOR". A language dropdown menu is set to "English". Below the header, there are links for "Need Help? Watch the Videos" and "Read How AWS Pricing Works". A banner for the "FREE USAGE TIER" states: "New Customers get free usage tier for first 12 months". The main section is titled "Services" and "Estimate of your Monthly Bill (\$ 0.00)". It includes a "Choose region:" dropdown set to "Europe (Ireland)" and a note about inbound and outbound data transfer. The interface is divided into three main sections: "Compute: Amazon EC2 Instances", "Compute: Amazon EC2 Dedicated Hosts", and "Storage: Amazon EBS Volumes". Each section has a table with columns for Description, Instances, Usage, Type, Billing Option, and Monthly Cost. There are "Add New Row" buttons for each table. On the left side, there is a sidebar with a list of AWS services: Amazon EC2, Amazon S3, Amazon Route 53, Amazon CloudFront, Amazon RDS, Amazon DynamoDB, Amazon ElastiCache, Amazon CloudWatch, Amazon SES, Amazon SNS, Amazon Elastic Transcoder, and Amazon WorkSpaces. On the right side, there is a sidebar titled "Common Customer Samples" with links to "Free Website on AWS", "AWS Elastic Beanstalk Default", "Marketing Web Site", "Large Web Application (All On-Demand)", "Media Application", "European Web Application", and "Disaster Recovery and Backup".

Costs - Controlling

Costs - Controlling

- Activate Cost Allocation Tags
- Use Consolidated Billing
- Setup Billing Alerts
- Trusted Advisor
 - (Business / Enterprise)
- 3rd Party Reporting
 - Cloudability, CloudHealth, Cloudyn etc
- Try Cloud Checkr:
 - Costs
 - Security & Compliance
 - Monitoring, Inventory and Resource Utilisation
 - <http://cloudcheckr.com>

Design Tip – Use Templates!

- Version control your infrastructure!
- CloudFormation
 - Native
- Terraform
 - (Hashicorp)
 - Cloud agnostic

STOP! Gorilla time!

"I find it really hard to believe that we cannot collectively beat a company that sells books."

*Carl Eschenbach (2013)
VMware President & COO*

STOP! Gorilla time!

"I
CO

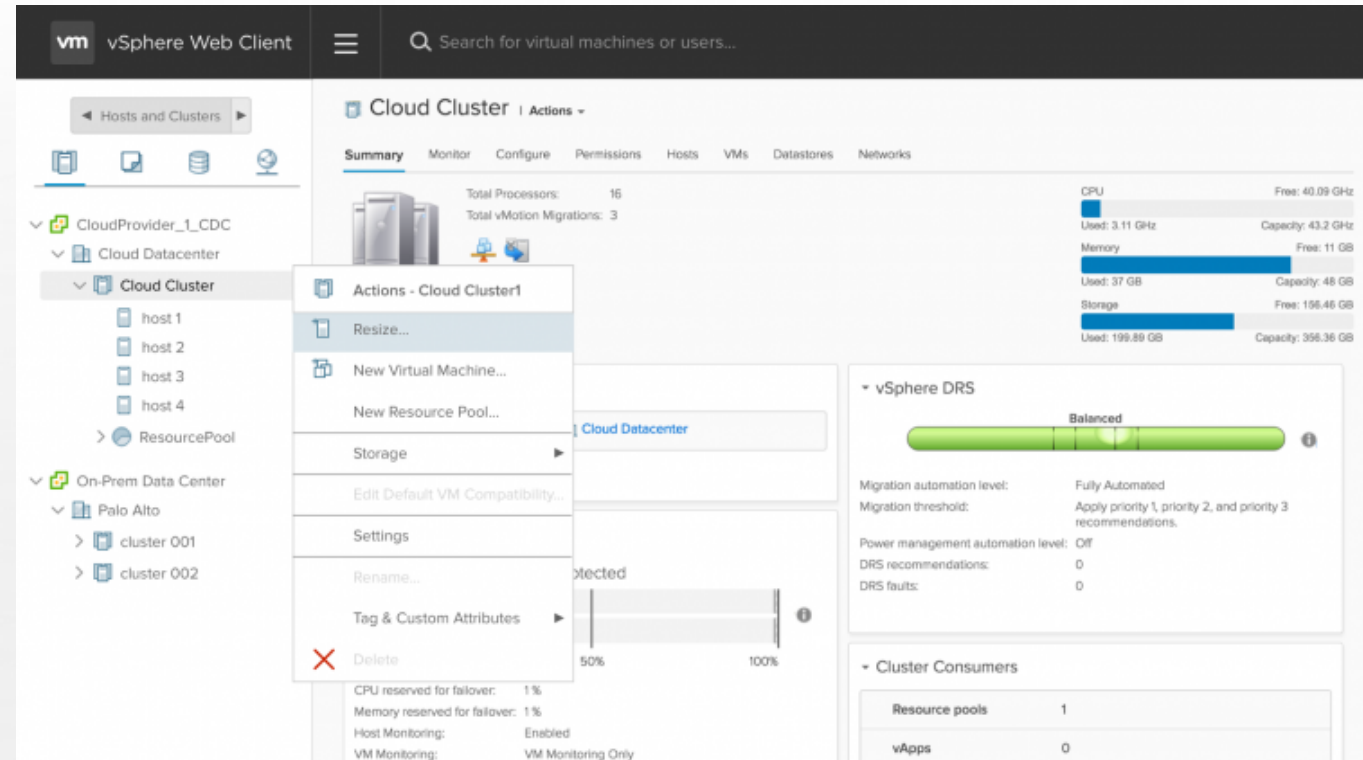

not
S."

(2013)
& COO

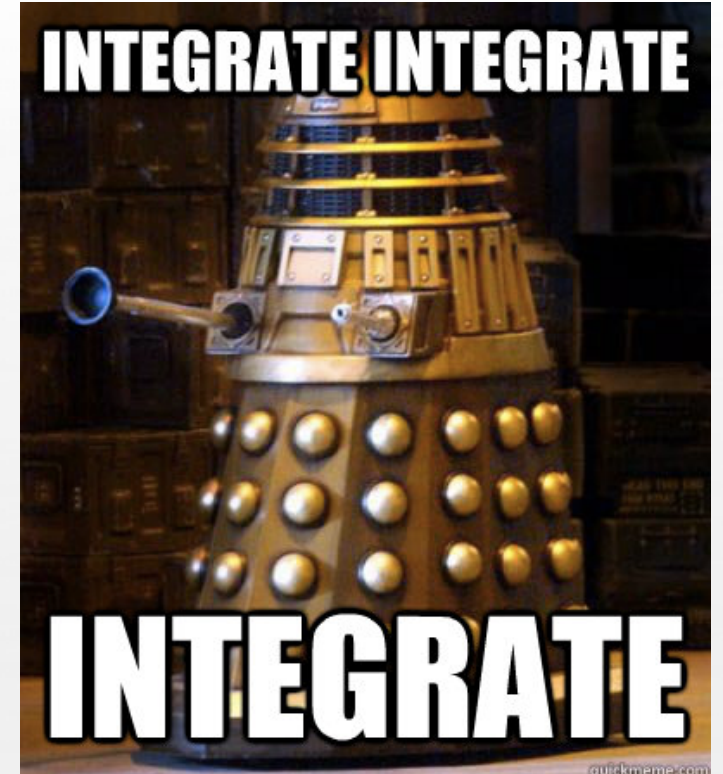

VMware on AWS

- VMware Cloud Foundation
 - vSphere 6.5, vSAN, NSX
- Bare Metal in AWS
- Licensed & Supported by VMware
- Elastic DRS
- Auto Remediation - HA
- XvMotion from On Premises
 - NSX Standalone Edge Appliance Locally

Further VMware and AWS Integration

- VMware Cross Cloud Architecture
- vRealize Automation – AWS Endpoint
- vROps Management Pack
- AWS Server Migration Service
- AWS Management Portal for vCenter
- Storage Gateway
- EC2 Import/Export
 - Only Imported Instances can be Exported

Key Takeaways

- Designing for Cloud is NOT like designing for vSphere
 - (But its not that different!)
 - Application HA is critical!
- Auto-scaling is magic!
 - For your application, your resilience, your agility and your budget
- Use tagging
- Use templates

Certification
